HET KALATHIYA

Full Stack Web Developer

hetkalathiya007@gmail.com • +91 79904 89490 • Surat, India

LinkedIn: linkedin.com/in/het-kalathiya GitHub:github.com/HetKalathiya

Portfolio: my-portfolio-website-pearl-zeta.vercel.app

Education

B.Tech, Computer Science and Engineering (Industry Embedded Program)

Parul University, Vadodara — Parul Institute of Engineering and Technology

CGPA: 7.58

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, REST APIs, Authentication and Authorization(Passport.js)

Databases & Tools: MongoDB, PostgreSQL, MySQL

DevOps and Tools: Vercel, CI/CD, Git and GitHub, Postman, Visual Studio Code

Projects

Derma Scan AI — AI Skin Analysis Web App

- Architected and deployed a full-stack skin analysis web application that generates comprehensive AI-driven medical reports, including diagnostic evaluations, ABCDE dermoscopic assessments, differential diagnoses, and treatment recommendations.
- Engineered seamless client-side PDF document generation for medical reports using jsPDF and jsPDF-AutoTable, enabling instant offline access and download.
- Integrated an interactive AI assistant via the Anthropic API to analyze generated reports dynamically and match patients with relevant specialists queried from MongoDB.
- Developed a lightweight, rule-based dermatology conversational engine supporting 40+ intent models using vanilla JavaScript, optimizing execution speed without third-party dependencies.

Geo Map — Live Traffic Analysis Project

- Engineered a real-time web application for live traffic congestion monitoring, incorporating interactive route mapping and dynamic congestion heatmaps using Mapbox GL JS.
- Integrated WebSocket connections to stream continuous real-time traffic updates and incident alerts, ensuring low-latency data synchronisation across client sessions.

Personal Portfolio Website

- Designed and built a responsive dark-mode portfolio website incorporating a custom HK brand monogram, backdrop-blur navigation elements, and interactive 3D tilt-and-glow UI components.
- Engineered a multi-stage animated entrance sequence featuring fluid state transitions and accessible fallbacks tailored for reduced-motion user preferences.

SaaS Project Management Platform (In Progress)

- Architecting an enterprise-grade project management application featuring customizable workspaces, interactive Kanban boards, automated workflows, and granular role-based access control (RBAC).

Additional

- Hands-on labs with Azure AI services (Speech SDK, Text Analytics, Azure AI Projects).

Certifications

- Full Stack Web Development — Udemy
- Claude 101
